RANE

TECHNICAL SPECIFICATIONS

Description: Rane Model RC2 Pacific is a free standing or built in 30x50" Inward swinging door, walk-in, side access tub.

Construction: The tub consists of 3/16" thick fiberglass-reinforced polyester laminate panels. Critical areas are reinforced with a 1/4" thick core of end-grain balsa and additional layers of fortifying laminate. The sanitary gel coat is an ISO/NPG type finish. Tub frame is welded aircraft grade aluminum box tube.

Side Entry Inward Swing Door: The door is right or left hinged and has a compression-type seal.

Access Openings: The front opening allows access to drain, legs and blower. Side opening allows access to tub body.

Drain and Overflow Assembly: An ample 1.5" drain is installed with an overflow.

Grab Bars: One 7.5 grab bar, firmly mounted to the interior wall of the tub.

Towel Bar: One acrylic towel bar conveniently located on the front of tub.

Leveling Legs: The sturdy stainless steel leveling legs will adjust up to 2" per leg.

Air Spa Option: 12 Jet Air Spa features a control system that allows for increasing the air flow at a gradual rate of speed at the push of a button. A ceramic heating element provides warm air that maintains the water temperature and warms the surface. Back flow prevention spring loaded jets eliminate the need for back flushing air lines, providing for longer life than the rubber flap style jets.

Whirlpool Option: Two jet, 3/4" horsepower pump.

Warranty: All Rane Tubs come with a standard five year limited warranty on external finishes and fiberglass shell, a three year limited warranty on specified parts, and a lifetime warranty on the door seal.
